### **EXAMINER'S AMENDMENT/REASONS FOR ALLOWANCE**

1. This action is responsive to communications: Amendment filed on 06/02/2005 and Interview conducted on 07/26/2005.
2. Claims 1, 3, 4, 6-10, and 37-52 are pending in this case. Claims 1, 37, and 45 are independent claims. Claims 1, 3, 4, and 6 have been amended in the Amendment filed on 06/02/2005. Claim 6 has been further amended in the Examiner's Amendment. Claims 2, 11-13, 16-24, 26, 28, and 30-34 have been cancelled in the Examiner's Amendment. Claims 37-52 have been added in the Examiner's Amendment.
3. The rejection of claims 1 and 4 under 35 U.S.C. 102(e) as being anticipated by Malik (US Patent Application Publication Number 2002/0065891) has been withdrawn due to amendments.
4. The rejection of claims 3 and 6-10 under 35 U.S.C. 103(a) as being unpatentable over Malik (US Patent Application Publication Number 2002/0065891) has been withdrawn due to amendments.

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Lukon on July 26, 2005.

The application has been amended as follows:

2. (Cancelled)

6. (Currently Amended by the Examiner) The method of Claim [[4]] 1, further comprising:

comparing the email name to an email name list;

finding a matching name in the email name list, the matching name sharing at least one characteristic with the email name; and

determining the display name associated with the matching name.

11-13. (Cancelled)

16-24. (Cancelled)

26. (Cancelled)

28. (Cancelled)

30-34. (Cancelled)

37. (New) A computer-readable medium having stored thereon computer-executable instructions for performing a method of recognizing the correct spelling of a word associated with an email application, the method comprising:

receiving an indication that an email name has been entered into a first field;

resolving the email name to a display name;

automatically adding the display name to a custom dictionary and at least one module consisting essentially of a spell checker module, auto-completion module, and a smart-tags module if the display name is identified as a new word;

receiving an indication that text associated with the display name has been entered into a body of an application;

comparing the text associated with the display name to a word list;

indicating that the text associated with the display name is correctly spelled in response to finding a match between the text associated with the display name and the word list; and

indicating that the text associated with the display name is incorrectly spelled in response to failing to find a match between the text associated with the display name and the word list.

38. (New) The computer-readable medium of Claim 37, wherein the text associated with the display name is a proper name.

39. (New) The computer-readable medium of Claim 37, wherein the display name is a proper name.

40. (New) The computer-readable medium of Claim 37, the method further comprising:

comparing the email name to an email name list;

finding a matching name in the email name list, the matching name sharing at least one characteristic with the email name; and

determining the display name associated with the matching name.

41. (New) The computer-readable medium of Claim 40, the method further comprising determining an email address associated with the matching name.

42. (New) The computer-readable medium of Claim 41, the method further comprising determining that the email name has been entered into a TO field of an email note.

43. (New) The computer-readable medium of Claim 37, the method further comprising storing the display name in the word list.

44. (New) The computer-readable medium of Claim 43, wherein the word list is a dictionary.

45. (New) A system comprising a processor and memory configured to perform a method of recognizing the correct spelling of a word associated with an email application, the method comprising:

receiving an indication that an email name has been entered into a first field;

resolving the email name to a display name;

automatically adding the display name to a custom dictionary and at least one module consisting essentially of a spell checker module, auto-completion module, and a smart-tags module if the display name is identified as a new word;

receiving an indication that text associated with the display name has been entered into a body of an application;

comparing the text associated with the display name to a word list;

indicating that the text associated with the display name is correctly spelled in response to finding a match between the text associated with the display name and the word list; and

indicating that the text associated with the display name is incorrectly spelled in response to failing to find a match between the text associated with the display name and the word list.

46. (New) The system, of Claim 45, wherein the text associated with the display name is a proper name.

47. (New) The system of Claim 45, wherein the display name is a proper name.

48. (New) The system of Claim 45, wherein the method further comprises:  
comparing the email name to an email name list;  
finding a matching name in the email name list, the matching name sharing at least one characteristic with the email name; and  
determining the display name associated with the matching name.

49. (New) The system of Claim 48, wherein the method further comprises determining an email address associated with the matching name.

50. (New) The system of Claim 49, wherein the method further comprises determining that the email name has been entered into a TO field of an email note.

51. (New) The system of Claim 45, wherein the method further comprises storing the display name in the word list.

52. (New) The system of Claim 51, wherein the word list is a dictionary.

## **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, none of the references, either singularly or in combination, teach or suggest to a person of ordinary skill in the art at the time of the invention the amended features, "...automatically adding the display name to a custom dictionary and at least one module consisting essentially of a spell checker module, auto-completion module, and a smart-tags module if the display name is identified as a new word; receiving an indication that text associated with the display name has been entered into a body of an application; comparing the text associated with the display name to a word list..." The examiner notes that while spell-checking using a custom word list is not a novel feature (See Examiner Referenced Patents and Non-patent Literature and the Applicant supplied Information Disclosure Statements), in combination with the other limitations of the method steps of the independent claim (i.e. automatically adding the display name to a custom dictionary and at least one module consisting essentially of a spell checker module, auto-completion module, and a smart-tags module if the display name is identified as a new word; receiving an indication that text associated with the display name has been entered into a body of an application; comparing the text associated with the display name to a word list) the limitations of claim 1 are considered novel, and unobvious to a person of ordinary skill in the art at the time the invention was made in view of the prior art of record.

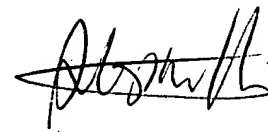

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
